## STRATEGO® Fungicide

EPA Reg. No. 264-779

For Control of Aggregate Sheath Spot  
(*Rhizoctonia oryzae-sativae*) and Stem Rot  
(*Sclerotium oryzae*) on Rice.

# PRODUCT BULLETIN

## FOR DISTRIBUTION AND USE ONLY IN THE STATES OF CALIFORNIA

**FIFRA Section 2(ee) Recommendation:** This recommendation is made as permitted under FIFRA Section 2(ee) and has not been submitted to or accepted by the U.S. Environmental Protection Agency. It is a violation of federal law to use this product in a manner inconsistent with its label. This product bulletin must be in the possession of the user at the time of pesticide application. Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

### USE RECOMMENDATIONS

#### RICE

Stratego® can be applied at rates of 16 to 19 fl oz/a for the control of aggregate sheath spot (*Rhizoctonia oryzae-sativae*) and stem rot (*Sclerotium oryzae*). For control of stem rot, initiate applications from full tiller to panicle differentiation or at the initial sign of disease. For control of aggregate sheath spot, begin applications at or near panicle differentiation up through boot split or at the initial sign of disease. Under heavy disease pressure and conditions favorable for disease development, a second application may be applied. Application may be made by either by ground or air.

Refer to the California-approved Stratego® label for directions to control additional diseases and/or for product use precautions/restrictions.
